

## A vehicle population system

AutoParc assists parts, components and accessory suppliers to analyse market potential and determine market penetration at a product level.

Information is based on vehicle sales by model into licensing districts over the last 30 years.

The national PARC volumes are comparable to the NATIS system and only include those manufacturers that provide detailed sales figures.

### Available Reports:

- VIN validation by first 10 digits
- Specific vehicle derivative by licensing district
- More than 9 million motorised vehicles available
- Breakdown by province, region and licensing district
- 30 year total PARC, rolling total PARC, yearly PARC by each individual year
- Download to Excel

### AutoParc Data:

- Manufacturer
  - Make/Brand
  - Model/Derivative
  - Import / local
  - Fuel type
  - Drive type
  - Gear type
  - Body shape
- 
- Province
  - Region
  - Licensing district
  - Custom regions
