AUTO

## Lightstone LIVE helps you manage costs with new user roles

User role customisation is even easier with our latest mobile App release. As a manager or Super User you can now set roles for all the users in your company to perform different actions - from only scanning a vehicle to scanning and generating reports on vehicles and people.

The roles available are:

**Scan Vehicle Only** - quickly capture accurate details on a vehicle and it's **FREE** - that means no cost to your dealership!

**Scan Vehicle and Person Only** - useful to scan driver's licence card before a test drive and link it to the vehicle the person is interested in

**Scan and Verify Vehicle** - full check and verification of vehicle

**Scan and Verify Person** - use before test drives and to check affordability and risk score of person

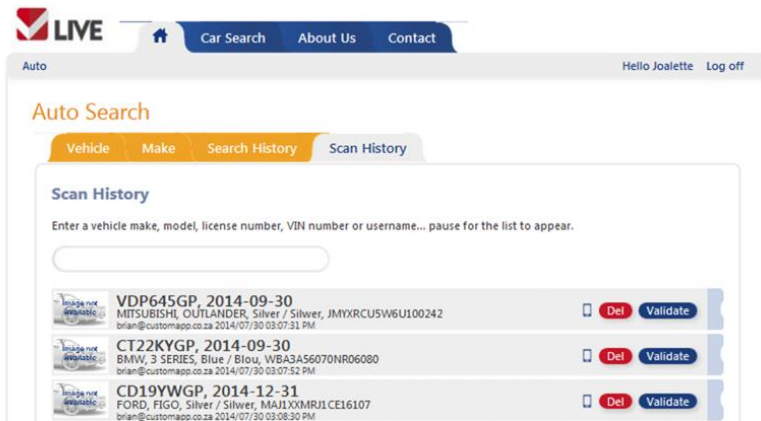

**Scan and Verify Vehicle and Person** - full check and verification

All scans performed by your users will now be available under a new section called **Scan History**. Users can view their own scans by default and if their permission is set to "View All" they will be able to see all the scans performed within the dealership.

When you verify a report from the scan history it will be moved to the search history. If you want to see all users scans and reports - make sure you have the "View all" permission set for your user account.

Users that are given a scan vehicle only role will not incur any costs and you can choose which scans to verify.

Remember to download the latest release of the App from either your PlayStore or iTunes Store to use the latest features. The App stores can take a few days to release the upgraded version so watch out for your app update notification. The website login has been automatically updated.

To enable custom roles speak to your dealerships Super User administrator or contact your Lightstone Auto Business Consultant.

Regards  
The Lightstone Auto LIVE Team
